Summary

I am a Full Stack Engineer with work experience at PT Okta Prima Mulya and Platon, and have attended various trainings at Dicoding, Altera, Binar Academy, and others. I am determined to continue developing as a programmer and deepen my understanding of system security. With skills in JavaScript, PHP, and Golang, I am ready to collaborate on creative projects in the future.

Pengalaman

- Platon** 1 Oktober 2023 - 30 Maret 2024
Fullstack Engineer
 - Responsible for developing web and mobile applications for clients across various industries, from initial planning to launch.
 - Conduct database schema design and backend development to ensure application security, performance, and scalability.
 - Manage the frontend slicing process using technologies such as HTML, CSS, and JavaScript to create responsive and visually appealing user interfaces.
 - Directly interact with clients to gain deep understanding of their needs, and design and implement new features according to agreed specifications.
 - Deliver presentations to clients to showcase project progress, explain utilized technologies, and provide recommendations regarding hosting infrastructure and database configuration.
 - Provide technical support and post-implementation maintenance to clients, including software updates, issue resolution, and performance enhancements.
- Platon** 13 Februari 2022 - 1 Oktober 2022
Fullstack Engineer (Freelance)
 - Collaborate with product managers (PM) through Google Meet to discuss project requirements and tasks before undertaking assignments.
 - Execute assigned tasks including slicing, integration, database schema creation, and setting up database accounts such as in Supabase, as well as VM hosting setup, based on project requirements.
 - Frequently utilize technologies such as Next.js, Prisma ORM, React.js, Express.js, Sequelize, and others to complete tasks effectively.
 - Work independently to meet project deadlines and deliverables, ensuring high-quality results that meet client expectations.
 - Communicate regularly with clients to provide updates on project progress, address any issues, and gather feedback for iterative improvements.
- PT Okta Prima Mulya** August 2023 - October 2023
Full Stack Developer
 - Developed an e-commerce platform featuring key functionalities such as auctions, concierge services, buying and selling, and item requests. Employed Next.js and Tailwind CSS for frontend slicing to match the design specifications provided in Figma.
 - Designed database schemas using MongoDB and built the backend using Express.js to support platform functionalities including notifications, chat, and fee deduction calculations.
 - Implemented Message Queue technologies like RabbitMQ and Socket.io to deliver notifications to users within specified time frames, such as auction win notifications, loss notifications, and bidding updates.
 - Integrated with Stripe payment services to facilitate seamless payment processing within the e-commerce platform.
 - Utilized Node Mailer to send account verification emails, payment notifications, and other communications to platform users.
- Freelance** March 2022 - January 2023
Web Developer
 - Developed an application for farmers and agricultural advisors at the Ngawi District Agriculture Department. Technologies used include Express, React, PostgreSQL, Socket.io, Swagger, among others.
 - Created an admin dashboard for pharmacists to manage medication inventory, including features for medication intake, dispensing, and cashier functions. This project was built using Codelgniter 4, Tailwind CSS,

and MySQL.

- Engaged in projects involving slicing and integration with provided APIs. Utilized technologies such as HTML, jQuery, Ajax, and Bootstrap for efficient implementation and integration.
